THE ONE-PARAGRAPH READ

9520 Ekwanok is a **2,252 sq ft, single-level 3-bed / 2-bath** home in the **Four Seasons neighborhood of Mission Lakes Country Club** — a Ted Robinson–designed golf community where the **\$465 monthly HOA includes unlimited golf for two owners on title** plus a full resort amenity set. MLS CMTY At **\$175/sq ft** it is **priced below the Desert Hot Springs median of ~\$221/sq ft** MKT and below the bottom of Mission Lakes' typical \$/sq ft band — a genuine value entry into country-club ownership. The kitchen is **remodeled (granite, island, skylights)**, it is one of the **larger floor plans** in the community, and the seller is **motivated, taking all offers** with **wide financing** (Cash, Conventional, FHA, VA, 1031). MLS The honest counterweights are a **softer DHS macro** (median DOM ~104 days, prices roughly flat-to-slightly-down) and property specifics — **septic system, 1988 vintage, no private pool** (resort-style *community* pools/spas instead). MLS MKT

WHY THIS BEATS A PORTAL

- Valuation is **built from the Mission Lakes & DHS cohort**, not an automated zip-code AVM.
- Quantifies the **HOA value** — what unlimited golf + amenities are actually worth versus dues.
- Risk is scored at **parcel/community context** (incl. the real San Geronio wind factor), not a headline.
- Maps the home to **six distinct buyer profiles** and ranks **improvement ROI**.
- Every figure carries a **source tag**; MLS facts are separated from interpretation.

Valuation basis & confidence rubric are defined in §6 (Market Intelligence) and §13 (Methodology). PropertyDNA value is a comparative model output, not a USPAP appraisal.

Why This Property Stands Out

Evidence-based differentiation versus competing Mission Lakes and Desert Hot Springs inventory.

Floor plan, light & functionality

A **light-filled single-level plan** with **all bedrooms down**, a **main-floor primary suite** with dressing area, formal dining + breakfast nook + kitchen island, family and living rooms, and a utility room. MLS **Skylights** in the kitchen and **sliding-door** indoor-outdoor flow support the "light and airy" character. MLS At **2,252 sq ft** it is among the **larger plans** in a community where homes run 1,600–2,700 sq ft. CMTY

Remodeled kitchen & baths

Kitchen is recorded **Remodeled** with **granite counters, island and skylights**. MLS Baths feature **double vanities, a Jack-&-Jill dual entry, shower & tub, tile counters and a jetted tub**. MLS Flooring is a mix of **wood, tile and carpet**; roof is **clay tile**; windows include **stained-glass** accents. MLS

Golf-course lifestyle

Golf course within the development and a **close-to-clubhouse** lot location. MLS Mission Lakes' Ted Robinson course (18 holes, par 71, ~6,737 yds) is **included for two owners on title with no greens fees** via the HOA — a rare structure in the desert. CMTY

Outdoor living & lot

A **0.18-acre lot** with **landscaped front and back yards**, block/stucco/wrought-iron fencing, and a **covered concrete patio with awnings**. MLS The lot is described as **hilltop/hillside, on a private road**, reflecting Mission Lakes' elevated setting roughly **1,000 ft above Palm Springs** at the mountain base. MLS CMTY

Mountain views — verify

The MLS records "View: No." MLS The hilltop/hillside lot and the community's elevated, mountain-base position suggest desert/mountain outlooks, and the listing references "sun rising over the mountains," but *a formal view is not designated — buyers should confirm sightlines on tour*. This report does not assert a view beyond the MLS record.

Value relative to comparable homes

At **\$175/sq ft**, the home prices **below the DHS median (\$221/sq ft)** MKT and below the typical Mission Lakes \$/sq ft band — while delivering a larger plan, a remodeled kitchen, and the full HOA amenity package. DNA See the comparison set in §6.

Observed vs. verified. Listing photographs were not machine-readable from the secured MLS share link, so this report makes **no AI photo-derived claims** about upgrades or deferred maintenance. Property condition is recorded as **Additions/Alterations** and the home is sold **as-is**; a buyer should confirm permit status for any additions, plus septic, roof and HVAC condition, on inspection. MLS *AI computer-vision observations: data unavailable.*

Buyer Advantages — By Profile

Who this home fits, and the specific, factual reason why.

Golfers

Unlimited golf for two on title, no greens fees, on a Ted Robinson course — the per-round economics are exceptional for an avid player. CMTY MLS

Retirees

Single-level, **no-step foyer entry**, all bedrooms down, low-maintenance HOA grounds, full amenity slate (fitness, pools, pickleball). MLS

Second-home owners

HOA covers **grounds & amenities**; vacant & easy-to-show; staging furniture available outside escrow for a turnkey set-up. MLS

Seasonal residents

Lock-and-leave community living at a **low entry price**; resort pools/spas maintained by the association; minutes to Palm Springs. MLS GEO

Investors

1031-eligible; larger-than-typical plan at below-median \$/sq ft. **Note: rental restrictions apply** — confirm long-term lease terms with the HOA before underwriting. MLS

First-time country-club buyers

FHA & VA financing accepted — a genuinely accessible path into golf-community ownership that most desert clubs don't offer at this price. MLS

What the \$465 HOA actually buys MLS

Beyond unlimited golf for two, the association amenity list is unusually deep for the price: clubhouse, restaurant & bar, fitness center, tennis, paddle tennis & pickleball, multiple pools & spas, banquet/meeting rooms, billiard & card rooms, sport & basketball courts, greenbelt/park, lake/pond, hiking & biking trails, picnic areas, playground, guest parking, and grounds maintenance & management. MLS For a value buyer, the dues-to-amenities ratio is the headline.

04

Mission Lakes Country Club

Community character, the golf experience, and the surrounding desert geography.

The club at a glance

Golf course	Ted Robinson Sr. design, opened ~1971	CMTY
Layout	18 holes · par 71 · ~6,737 yards	CMTY
Setting	Mountain base, ~1,000 ft above Palm Springs	CMTY
Golf in HOA	Unlimited for two owners on title	MLS
Clubhouse	Dining, bar, pro-shop, fitness, on-site hotel	CMTY
Racquet & rec	Tennis, paddle, pickleball, pools/spas, trails	MLS
Home sizes	≈1,600–2,700 sq ft, 2–4 bd	CMTY
HOA dues	\$465/mo	MLS

Character & ownership experience

Mission Lakes is consistently positioned as one of the valley's **value-leading golf communities** — resort-style amenities "without resort-level costs." MLS The course's **final four holes** are regarded among the toughest finishing stretches in the desert. CMTY The community's elevation at the San Bernardino mountain base gives it a distinct, slightly cooler and more open feel than the valley floor. The directions reference a **main community gate**, though the MLS does **not** classify the community as fully gated — *confirm gate/security specifics with the HOA.* MLS

05

Community Comparison

How Mission Lakes sits among nearby Desert Hot Springs / north-valley options. Balanced, not ranked.

COMMUNITY	TYPICAL PRICE	HOA/MO	GOLF INCLUDED?	CHARACTER
Mission Lakes CC	\$355K–\$500K	\$465	Yes — unlimited, 2 on title	Full 18-hole club + deep amenities; value leader MLS MKT
Skyborne	~\$290K–\$450K	\$118	No	Newer master-planned; low dues, no golf MKT
Mountain View Country Estates	\$400K–\$520K	\$135	No	Fee-simple, 387 homes; no golf MKT
Hidden Springs CC	\$65K–\$175K	+ land lease	Manufactured-home golf (55+)	Lowest entry; land-lease model MKT
Desert Dunes	<i>data unavailable</i>	<i>n/a</i>	Public/championship-adjacent	Robert Trent Jones Jr. public course area GEO
Palm Springs CC areas / Cathedral City golf	Generally higher	Varies	Varies	Closer to central PS; typically higher \$/sq ft MKT

WHERE MISSION LAKES WINS

- **Golf economics:** the only nearby option bundling **unlimited golf** into modest dues. MLS
- **Amenity depth** per dollar of HOA is the broadest in the set. MLS
- **Accessibility:** FHA/VA-friendly entry into a real country club. MLS

WHERE ALTERNATIVES MAY FIT BETTER

- **Lowest dues:** Skyborne/Mountain View carry far lower HOAs for buyers who don't golf. MKT
- **Lowest entry price:** Hidden Springs (manufactured/land-lease) is cheaper but a different ownership model. MKT
- **Central-PS proximity:** Cathedral City / Palm Springs CC areas sit closer to the urban core, usually at a higher price. MKT

Comparison is by **fit and trade-offs, not a ranking**. For a buyer who values golf and amenity breadth at a low entry price, Mission Lakes is hard to match; for a non-golfer prioritizing minimal dues or central-PS location, other communities may suit better.

Flat-to-slightly-soft MKT

Comparison cohort MKT CMTY

REFERENCE	PRICE BAND	SIZE BAND	IMPLIED \$/SQ FT	NOTE
9520 Ekwanok (subject)	\$395,000	2,252 sf	\$175	Remodeled kitchen · larger plan · community pool
Mission Lakes CC cohort	\$355K– \$500K	1,600– 2,700 sf	~\$185– \$210	Golf-included community MKT
Desert Hot Springs (all, median)	~\$412K list	—	\$221	Citywide median MKT
Mountain View Estates (no golf)	\$400K– \$520K	1,200– 2,500 sf	~\$200+	Fee-simple, lower HOA MKT

Exact recent **closed** Mission Lakes comparable sales were not retrievable from automated public sources at time of writing — data unavailable. Bands above are active asking/listing references and community price ranges; treat implied \$/sq ft as guidance, not transacted value.

How the PropertyDNA value is built DNA

1. Mission Lakes cohort implies $\approx$ **\$185–\$210/sq ft** for typical homes.
2. Apply the **lower-middle** of that band to the subject — larger plan dilutes \$/sq ft, no *private* pool, septic, 1988 vintage $\rightarrow \approx$ **\$180–\$190/sq ft**.
3. $\times$ 2,252 sq ft $\rightarrow$ **\$405K–\$428K**; midpoint $\approx$ **\$410,000**, range **\$390K–\$435K**.
4. Cross-check: subject's \$175/sq ft is **below** the DHS median \$221/sq ft — independent value support. MKT

The \$395K list sits just **below** the model midpoint — i.e., priced as a value entry rather than a stretch, consistent with a motivated, all-offers seller.

Negotiation environment

- **Motivated seller, "send all offers," sold as-is** — a constructive posture for a prepared buyer. MLS
- Only **33 days on market** vs. a DHS median of $\sim$ 104 — priced to move, so deep discounts are less likely than terms wins. MLS MKT
- **Wide financing** (Cash, Conv, FHA, VA, 1031) widens the buyer pool and supports a clean close. MLS
- Softer DHS macro tempers appreciation but also keeps entry pricing reasonable. MKT

Read: a **balanced-to-slightly-buyer** environment. With the list already at a value level, the strongest plays are a clean, well-qualified offer near ask and asking the seller to address inspection items (septic, roof, any unpermitted additions) as credits.

PropertyDNA Risk Analysis

Scored at parcel/community context. Lower scores are better (0 = negligible, 100 = severe).

PROPERTYDNA RISK SCORES

RISK

PLAIN-ENGLISH EXPLANATION

Wind (60, moderate-high) is the distinctive DHS risk — the home sits near the **San Gorgonio Pass** wind corridor. Budget for wind-rated maintenance; the **clay-tile roof and stucco** help. RISK MLS

Heat (78, high) is inherent to the desert, modestly tempered by the community's ~1,000-ft elevation and mountain-base breezes. Central AC is in place. MLS

Flood (28, low) — DHS parcels are typically **FEMA Zone X** (outside the 100-yr floodplain). *Confirm the exact zone for APN 661131009*; regional pluvial risk exists in storms. RISK

Maintenance (50) — 1988 build, **septic system**, and an **Additions/Alterations** condition flag: inspect septic, roof, HVAC, and verify permits for additions. MLS

Liquidity (55) / Resale (50) — DHS carries a longer ~104-day median DOM and flat-to-soft pricing; offset here by value pricing and amenity appeal. MKT

INSURANCE CONSIDERATIONS

CA market hardening plus wind exposure lift premiums; non-combustible **clay-tile roof + stucco + slab** help. Get a bound quote early.

MLS

HOA CONSIDERATIONS

\$465/mo is **low for the amenity set** (incl. unlimited golf), but verify reserves, any special assessments, and rental rules.

MLS

RESALE CONSIDERATIONS

Value pricing + golf-included story aid resale; the DHS macro and septic/age are the offsets. Buying at/below model protects downside.

DNA

Regional climate ratings are community/zip-level indicators, not a parcel FEMA determination, a CLUE/insurance quote, or a professional inspection. Treat scores as a **triage tool**.

08

Future Equity Analysis

Five-year projections at three appreciation paths, anchored to a ~\$405K basis.

CONSERVATIVE · 1.5%/YR

≈ **\$436K**

+7.7% over 5 yr · confidence: high DNA

EXPECTED · 3.0%/YR

≈ **\$469K**

+15.9% over 5 yr · confidence: moderate DNA

OPTIMISTIC · 4.5%/YR

≈ **\$505K**

+24.6% over 5 yr · confidence: lower DNA

What drives the range

Desert Hot Springs has recently been **flat-to-slightly-down** year-over-year MKT, so the **conservative** path carries the highest confidence. Upside levers: the **relative affordability** of DHS versus the rest of the valley historically narrows in up-cycles, the **golf-included value story** supports demand, and **buying at/below the model** (~\$405K vs. \$395K list) starts equity from a sound basis rather than a premium. DNA

Permit & value-add note

- Condition is **Additions/Alterations** — *permit history for APN 661131009 is data unavailable; verify before valuing any addition as living area.* MLS
- Targeted, well-permitted improvements (see §9) can lift the home toward the **top of the Mission Lakes band (~\$500K)**. DNA
- Projections exclude transaction/carrying costs, HOA and tax; they are compounding illustrations, not forecasts.

09

Improvement Opportunities

Highest-ROI moves supported by the home's current condition. Figures are planning estimates.

IMPROVEMENT	EST. COST	EST. VALUE LIFT	NET EQUITY	CONFIDENCE
Replace carpet w/ LVP / tile (whole-home consistency)	\$8K–\$14K	\$15K–\$22K	+\$5K–\$10K	High
Primary & guest bath refresh (vanities, fixtures, surfaces)	\$12K–\$22K	\$20K–\$32K	+\$8K–\$12K	Moderate
Desert curb-appeal / xeriscape refresh	\$5K–\$10K	\$10K–\$16K	+\$4K–\$8K	High
Interior/exterior paint + lighting modernize	\$6K–\$12K	\$12K–\$18K	+\$5K–\$8K	High
Private spa / outdoor-room buildout (lot supports it)	\$18K–\$35K	\$15K–\$30K	–\$3K–+\$5K	Lower

Kitchen is already **remodeled** (granite, island, skylights), so it is intentionally excluded as low incremental ROI.

MLS Estimates are **planning ranges** for the DHS market, not bids; a private pool is generally **not** recommended for ROI here given the community already provides heated resort pools/spas. Verify permits before any structural addition. DNA

Strengths & Considerations

A balanced ledger. Considerations are contextualized, not weaponized.

Strengths

- **Unlimited golf for two on title** bundled into a low \$465 HOA. MLS CMTY
- **\$175/sq ft — below the DHS median \$221/sq ft** and the Mission Lakes band: a value entry. MKT
- **Larger plan (2,252 sf)**, single-level, all-bedrooms-down, main-floor primary suite. MLS
- **Remodeled kitchen** (granite, island, skylights); jetted-tub baths; clay-tile roof. MLS
- **Deep amenity set** — clubhouse, fitness, tennis/pickleball, pools/spas, trails, lake. MLS
- **Wide financing** (Cash, Conv, FHA, VA, 1031) + motivated, all-offers seller. MLS
- **Minutes to Palm Springs & PSP airport**; ~1 hr to Joshua Tree. GEO

Considerations

- **Desert Hot Springs location** — farther from central Palm Springs than some communities, but offers more home for the money and a low entry into country-club living. MKT
- **Softer DHS macro** (~104-day median DOM, flat-to-slightly-down pricing) — tempers appreciation, but also keeps entry pricing reasonable. MKT
- **Septic system** (not sewer) — budget for inspection/pumping; common and manageable in the area. MLS
- **Built 1988, sold as-is, Additions/Alterations** — inspect roof/HVAC and verify permits; reflected in the value-friendly price. MLS
- **No private pool** — offset by heated resort-style *community* pools & spas maintained by the HOA. MLS
- **Wind exposure** (San Gorgonio Pass) — a regional trait; the tile roof/stucco construction is well-suited to it. RISK
- **Rental restrictions apply** — investors should confirm allowable lease terms with the HOA first. MLS
- *Exact closed comps, parcel flood zone and permit history were not retrievable from automated sources — verify before offer.*

Lifestyle Score

Each score carries a one-line factual basis. Scale 0–10.

BASIS FOR EACH SCORE

- Golf 9.5** — unlimited play for two on a Ted Robinson 18 in the HOA. MLS CMTY
- Value 9.2** — \$175/sf vs. \$221 median; golf included. MKT
- Retirement 8.8** — single-level, no-step entry, full amenities. MLS
- Second-home 8.5** — HOA-maintained, lock-and-leave, turnkey option. MLS
- Outdoor rec 8.5** — trails, pools, tennis/pickleball; Joshua Tree ~1 hr. MLS GEO
- Entertaining 8.0** — open plan, island kitchen, patio + community banquet space. MLS
- Mountain scenery 7.8** — elevated mountain-base setting (MLS lists no formal view). MLS
- Privacy 7.5** — landscaped, fenced lot on a private road (not fully gated per MLS). MLS
- Investment 6.8** — strong value & cash-flow story, tempered by soft DHS macro + rental rules. DNA

PropertyDNA Final Recommendation

A balanced conclusion for an informed buyer.

Rating B+

71

Confidence 71/100 · Moderate

Opportunity 8.0/10

9520 Ekwanok earns serious consideration as a **value play**. It pairs a **larger, single-level, remodeled-kitchen home** with a country-club membership structure that is genuinely rare — **unlimited golf for two bundled into a \$465 HOA** alongside a deep amenity set — and it asks **\$175/sq ft, below both the Desert Hot Springs median and the Mission Lakes band**. Those are facts, and together they make a strong affordability-plus-lifestyle case. MLS MKT CMTY

The honest counterweights are macro and mechanical, not dealbreakers: a **softer DHS market**, a **septic system**, a **1988 as-is** home with an additions/alterations flag, and **no private pool** (offset by heated community pools/spas). The PropertyDNA model centers value at **≈\$410K (range \$390K–\$435K)**, so the **\$395K list is already a value entry** rather than a stretch, and the seller is **motivated and taking all offers** with **FHA/VA/1031-friendly** terms. DNA MLS

Recommendation: tour and inspect (septic, roof, HVAC, permits), then make a clean, well-qualified offer **at or near the \$395K list**, using inspection findings for targeted credits rather than expecting a deep discount on an already value-priced home. For a golfer, retiree, seasonal owner, or value-focused investor who understands the DHS trade-offs, this is a **confident, evidence-backed buy** — a lot of home, and a lot of golf, for the money. This is a recommendation to **decide with the facts**, not under pressure.
